

See Yourself In The Digital Economy

Kazi Islam
Chief Executive Officer
Grameen Solutions

Kazi Islam joined Grameen Solutions as a Chief Executive Officer with more than 14 years of professional experience serving in industries such as IT, Communication, Media, Energy and Utility, Automotive and Consumer Electronics. Kazi Islam returned back to Bangladesh after 18 years of living and working abroad. His core focus is creating technology based solutions and services for developing countries through partnerships with global technology companies. He was instrumental in creating a partnership with Intel and bringing Intel's World Ahead Program to Bangladesh. He is also driving Grameen Solution's vision to build partnerships with global technology companies to jointly create technology based jobs, products, services and solutions for the developing world. Grameen Solutions, today, acts as a bridge between global technology companies and developing countries where technology solutions are enhancing lives of people while creating new market opportunities for global technology companies.

Kazi worked in multiple Fortune 500 companies including IBM and Ford. At IBM he worked as a Strategy Consultant in IBM Global Business Services. His consultancy experience includes Business and Strategy Development, Mergers and Acquisition, Business Process Management, Business Process Outsourcing, Joint Venture and Post-merger Integration, and Change Management. Some of the notable companies he served are Disney, Sharp, Samsung and Xcel Energy.

He also has extensive product development and manufacturing experience through working at companies like Ford, Jaguar and Mazda. His experiences include Lean Manufacturing, Product Planning and Development, Supply Chain Management and Market Growth Strategy.

Kazi Islam brings a strong educational background along with his extensive professional experience. He acquired his Bachelor of Science in Electrical and Computer Engineering, Master of Science in Systems Engineering and Master of Business Administration with emphasis in Management and Corporate Strategy.

His professional experience includes working in 3 different continents where he lived and worked in countries like USA, England and Japan. He currently lives and works in Bangladesh with a focus on identifying opportunities to improve lives through technology.
