

Wireless Performance Declaration

Center: Las Vegas CC (030) - NV

Company Name: _____

Show: 2005 International CES

Booth/Room #: _____

Overview

Smart City is proud to be the exclusive provider of wireless services in the Las Vegas Convention Center. The wireless service offers Internet access at speeds up to 256K servicing exhibitors as well as attendees. The actual maximum bandwidth available depends on how many users are accessing the network simultaneously at any given time. Streaming applications, DHCP, routers, NAT or proxy servers are not allowed with this connection. However, Smart City will happily engineer a dedicated private network to accommodate your needs. Please call for quote.

Please be advised that this is an entry level service ideal for web surfing and checking email. Smart City's wireless network can be accessed throughout the convention center by using a Wi-Fi® compatible 802.11 b/g network card or one of our rental bridge units (as we have a limited quantity of bridge units, please call for availability).

Smart City strives to provide seamless service so that all of our customers may have the most successful show possible. However, wireless service is inherently vulnerable to interference from other devices that transmit similar radio frequency signals or that operate within the same frequency spectrum. While we work tirelessly to properly manage the airwaves of our wireless system, we cannot guarantee that interference will not occur. For that reason this service is **NOT** recommended for product presentation or demonstrations. If you plan to demonstrate or present products, via the internet, we highly recommend that you purchase our hard wired services such as Shared Ethernet, Shared EtherNAT or T-1 service.

If you are unsure which of our products will best suit your needs please call our Customer Service Department at (888) 446-6911 and one of our Customer Service Representatives will be happy to assist you.

Restrictions and Special Requests

Due to the extensive coverage Smart City provides for the Las Vegas Convention Center, no access points are authorized for use within the Las Vegas Convention Center without Smart City approval (wireless access points without adjustable power outputs can not be authorized under any circumstances). Exhibitors who set up their own wireless system can interfere with the current wireless network. Therefore, Smart City requires all exhibitors **showcasing wireless products** to contact us 21 days prior to the show move-in date so that we may engineer a cohesive network operating without interference (all approvals will incur a site survey fee). Per our Terms and Conditions listed on our Network Service Contract, misuse of any wireless service may result in service interruption to yourself or other exhibitors and can lead to disconnection of your equipment. **No refunds will be given.**

ALL WIRELESS ACCESS POINTS NOT AUTHORIZED BY SMART CITY ARE PROHIBITED.

By my signature below, I attest that I understand the limitations and vulnerabilities of the wireless service provided by Smart City. I also understand that if I use this service for any reason including, but not limited to, demonstrating, showcasing or presenting my product(s), Smart City will not be responsible for possible interference that I may experience. Refunds will not be given for service issues found not to be the fault of Smart City. *** Upon receipt of this form, Smart City wireless services will be activated for your use. ***
