

Japan Toy Association Business Information

ST

Ideal

Toys are the “friends” which children encounter first.

Toys are good friends who shed light on children’ s five senses and foster their minds.

Toys represent each race and nation and are a measurement of cultural wealth.

By providing enjoyable, safe, and affordable toys, we are creators of culture who grant plenitude and lights to people’ s livelihoods from babies to the elderly.

Then, we, the people providing toys, promise to contribute to society proudly.

Greeting of Chairman

Japan Toy Association

Chairman MICHIIHIRO MAEDA

Children are the treasure entrusted to us by the future of humanity.

And toys are their friends and treasures that are essential to their growth.

We, at the Japan Toy Association, hope for the healthy development and growth of all children, take pride in engaging in the toy industry, and promote various businesses such as safety ensuring, development of industry, and international exchange, which bring together the power of the industry.

Especially, we conduct the Safety Toy Mark (ST Mark) program in order to ensure the safety of children which is a parent's greatest concern, whereas we promote "the accessible design toys" in order to enable handicapped children to enjoy playing with toys with ease.

Intellectual property rights such as copyrights for toys increase the value of the toy industry. We will make efforts to protect the intellectual property rights of Japanese toy companies, to eliminate infringing products, and thus to enhance consumer protection.

Toys have the power to directly affect children who are the next generation of society.

We will make it a mission of the JTA to provide gender-neutral toys in order to contribute to empowering children who will create a new era.

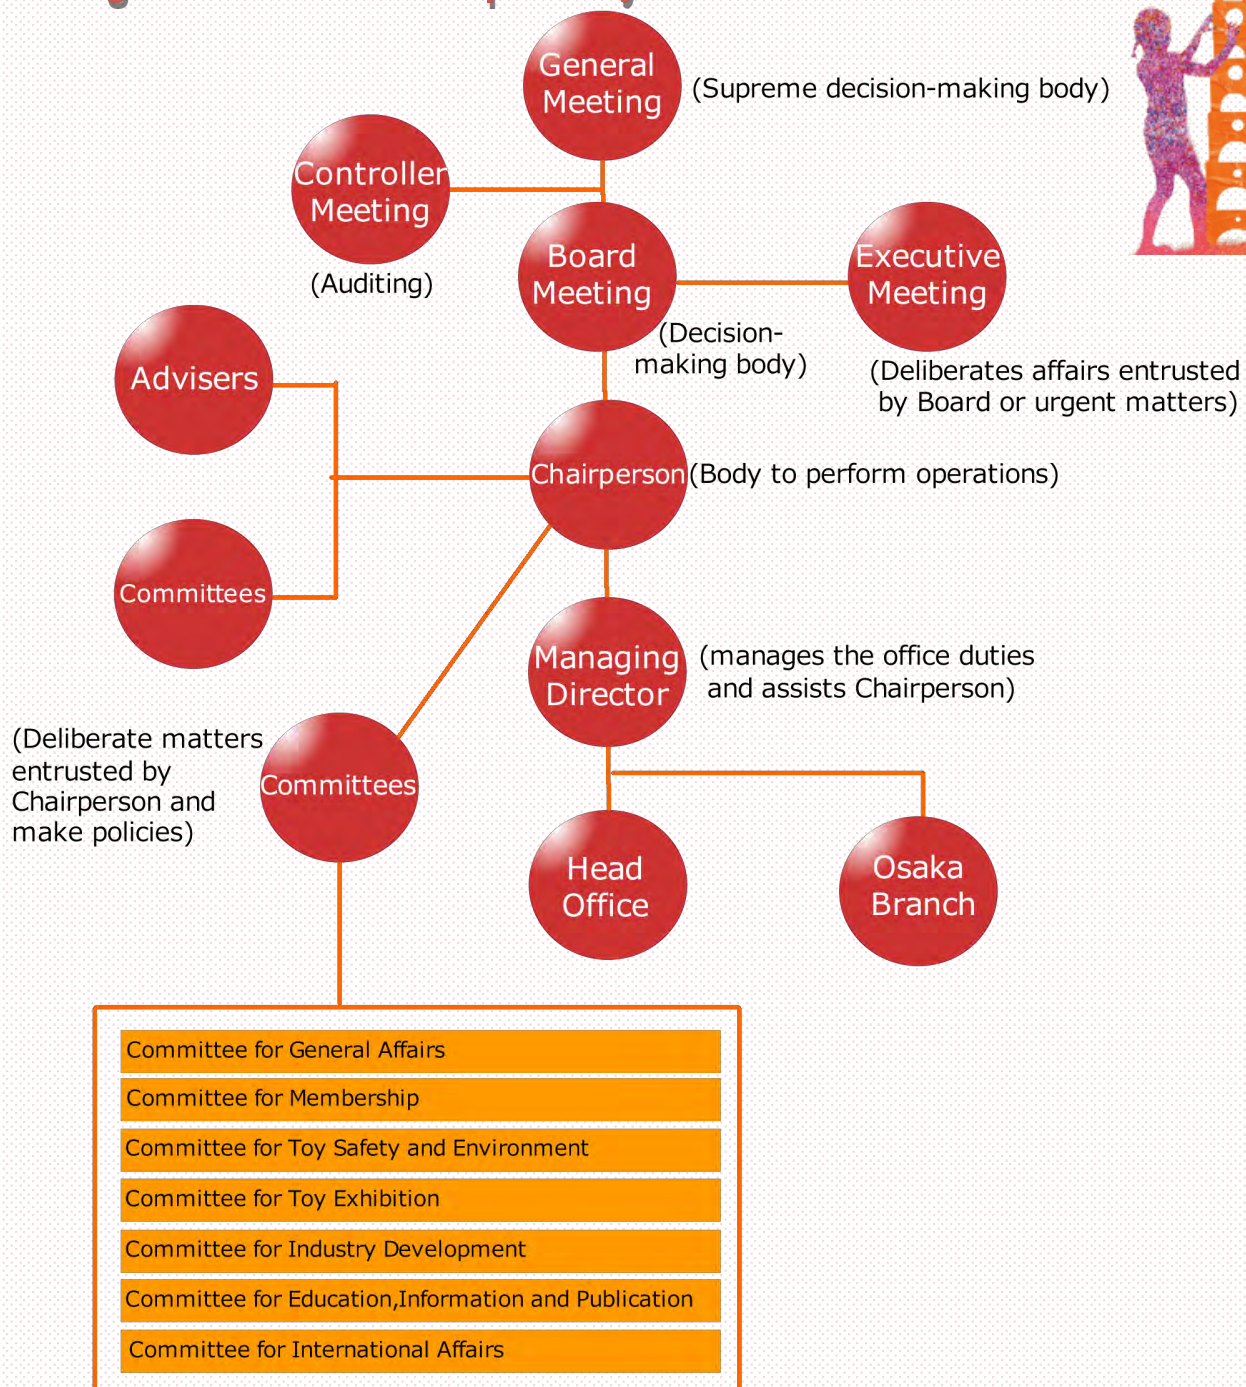

Outline of the Association

Name	The Japan Toy Association (JTA) URL https://www.toys.or.jp/		
Location	4-22-4 Higashi-Komagata,Sumida-ku, Tokyo, 130-8611 Japan Tel.03-3829-2513 Fax.03-3829-2510		
Number of members	173 (as of July 1, 2022)		
Chairperson	Michihiro Maeda		
Foundation	On August 1, 1967		
History			
	1962	February	“Japan International Toy Exhibition Association” was founded.
		October	The first “Japan International Toy Exhibition” was held.
	1967	August	The Japan Toy Association was founded. (Location: Kotobuki, Taito-ku, Tokyo)
	1971	October	Safety Toy Mark Program was established.
	1974	October	Toys General Liability Mutual Aid Program was started.
	1975	September	Participated in the International Council of Toy Industries (ICTI).
	1990	March	Started the “Suggestion of Small Convexity.” (The promotion project for the accessible design toys)
	1995	July	Established the Toy Product Liability Center as well as the product Liability Mutual Aid Program.
	2000	June	The "Japan Toy Association" merged with the "Japan International Toy Exhibition Association."
	2001	October	Started the seminar certifying the qualification of the toy advisers for department stores.
	2003	July	The open-to-the-public event “Exhibition of Future Toys” was held at Pacifico Yokohama.
	2006	July	Resumed the “Open-to-the-Public Event” at the Tokyo Toy Show
	2007	February	Organized “Japan Pavilion” at Int. Toy Fair Nuremberg.
	2008	June	Established the “Japan Toy Awards.”
		October	Revision of toy regulation in Japan’s Food Sanitation Law (Enhancement of Designated Toys, Introduction of the requirement of paint coating, etc.)
		December	Organized a Special PR Event for the Christmas season.
	2009	January	Opened “Website to search ST-approved toys.”
		April	Established “Toy Community Network” for toy specialist shops.
	2011	October	Promoted Tohoku Kids Expo at Sendai University.
	2013	April	Moved to new legal entity status (general incorporated association).
	2014	April	Hosted ICTI Annual General Meeting in Tokyo.
	2016	October	Exhibited the “Accessible design toys" booth at the International Home Care & rehabilitation Exhibition.
	2017	April	Import tariffs for toys were repealed.
		November	The "50th-anniversary book of JTA" was published.
	2018	May	Decided the measures to prevent airway obstruction accidents in infants caused by toys (Revision of Toy Safety Standard).
2019	December	The JTA was awarded "Prime Minister's Commendation" for its contribution to promoting "Accessible design toys."	

The Organization of the Japan Toy Association

The task of committees

Committee	Tasks
General affairs	Management of rules, budget and accounting, asset management, operation of General Meeting and Board Meeting, supervision of the head office
Membership	Extension of membership, relationship among members, honor of industrial contributors
Safety and Environment	Planning and management of ST Mark program, Establishment and maintenance of toy safety standard
Toy Exhibition	Affairs relating to planning and implementation of Tokyo Toy Show (including the Open-to-the-Public Event)
Industry Development	Intellectual property rights, customer services, accessible design toys, supervision of the Mutual Aid Programs
Education, Information, and Publication	Holding seminars for Board Directors, Provisions of information to the public and members, operation of the website
International affairs	International activities of ICTI and ACTI(including CARE Process)

Board Members

September 12, 2022

Toy Safety (ST Mark)

The first priority of parents is the safety of the toys with which their children play.

The safety of toys in Japan is assured by the ST Mark program operated by the JTA.

The JTA established "Toys Safety Standard" in 1971, in consultation with the authorities concerned, academic experts and representatives of consumers.

Based on the agreement between toy companies and the JTA, the toys which have been approved by the designated testing bodies of the ST standard are allowed to put the ST Mark on their products or packages.

"ST Marks" on the toys show that the JTA ensures that the toys were carefully manufactured in the safety aspect.

Toy Safety Standard (ST Standard)

(1) Mechanical and Physical Properties

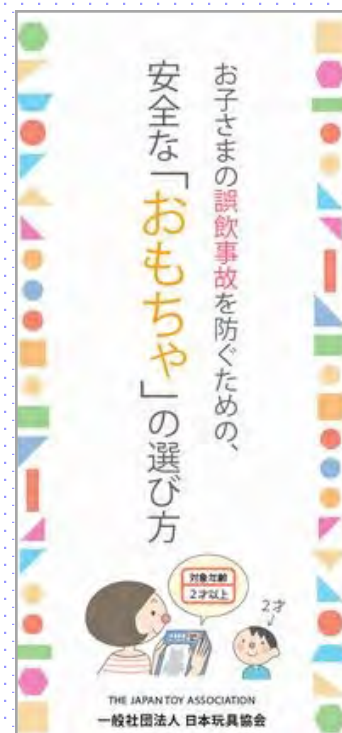

The standard stipulates the necessary shape and strength of toys and conformity tests shall be conducted in order to prevent children from being injured.

(2) Inflammability

Stuffed toys, toy tents, toy houses, toys that children wear shall be tested to make sure whether the prohibited materials such as Celluloid are not used, or whether the materials of toys are within the scope of inflammability or not.

(3) Chemical properties

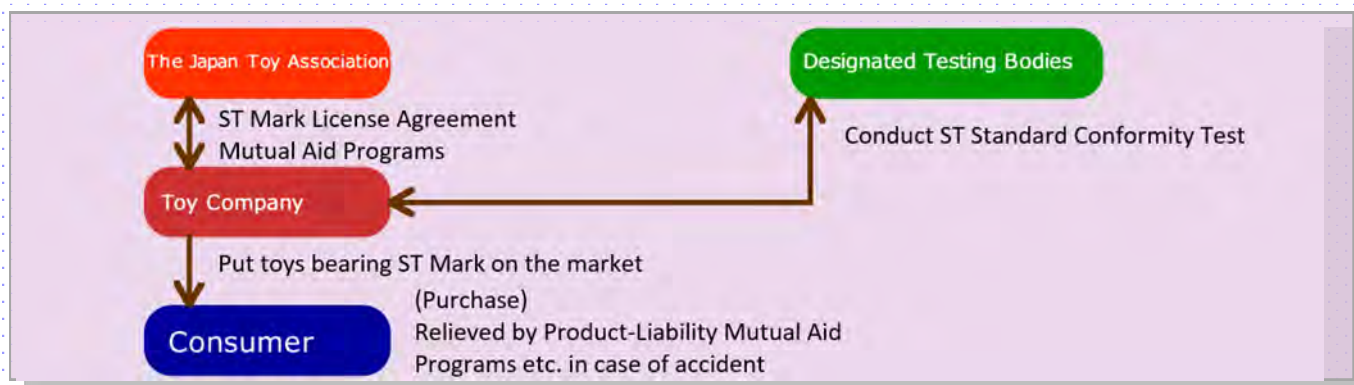

Toys are tested to make sure whether harmful substances are not used in the materials of toys.

The indemnification of damages caused by toys bearing ST Mark

The JTA sets Mutual Aid Programs to indemnify ST licensees for losses or damages suffered by accidents caused by ST Mark licensees are obliged to join the Toys General Liability Mutual Aid Program and the Product Liability Mutual Aid Program run by the JTA.

The covered benefits (maximum amount) are 100 million yen for physical injury, 20 million yen for property damage, and 100 thousand yen for consolation payment.

The Japanese toy market is the third largest after the United States and China, and many toy retailers and wholesalers as well as manufacturers are engaged in the toy business.

Every year the JTA holds the “Tokyo Toy Show,” the largest toy exhibition in Japan. It has provided opportunities to introduce new products and to develop business relationships, thus attracting many toy retailers, distributors, and other toy-related business people.

Since 2008, the JTA has been presenting “Japan Toy Awards” to encourage the development of high-quality toys with market relevance. Award-winning toys and other nominated toys are exhibited at the Award corner during the show.

The Tokyo Toy Show 2022 was held for two days (Buyers Days only) on June 16 and 17, 2022, at the Tokyo Big Sight West Hall 1-2, Atrium, with 96 exhibitors (93 from Japan and 3 from overseas). The two-day exhibition attracted 12,656 visits.

We are very pleased as the organizer to reconfirm the fascinating nature of toys which attracted many visitors who held vigorous sales discussions and a number of mass media who reported the Tokyo Toy Show.

Accessible design toys

A barrier-free society in which people with disabilities can enjoy a normal life without barriers is required to be realized. The "universal design" movement is being promoted in product planning and manufacturing to realize the barrier-free society.

As part of the toy industry's contribution to society, the JTA is promoting "Accessible design toys" (formerly "Suggestion of Small Convexity"), a universal design for toys.

"Accessible design toys" refers to toys that have been designed with "considerations"* so that children with visual or hearing difficulties can play with them in the same way as normal children.

The JTA's Committee for Industry Development certifies "Accessible design toys." Over the past 30 years, more than 4,000 accessible design toys have been certified.

In addition, the JTA has created a catalog of accessible design toys and distributed it to schools for the blind, toy retailers, and wholesalers throughout Japan.

At the end of December 2019, the JTA was awarded the Prime Minister's Commendation in the "Distinguished Service Award for the Promotion of Barrier-Free Universal Design" for its achievements in promoting accessible design toys for 30 years.

* The term "considerations" in the context of accessible design toys refers to such innovations as adding "small convex" to toys, such as the protrusion ("convex") on the "5" of a touch-tone phone. These innovations allow people with visual difficulties to play with the toys. Our goal is to make toys into "universal-use products" that can be used by people with and without disabilities.

Toys designed with "considerations" for people with visual difficulties are marked with a "Guide Dog Mark" featuring a Labrador Retriever, which serves as a guide dog for people with visual difficulties.

Toys designed with "considerations" for people with hearing difficulties are marked with a "Rabbit Mark" featuring a rabbit design.

The International Council of Toy Industries (ICTI: 17 participating countries) held in Australia in 1992 approved these marks as "international common marks." In 1993, the United Kingdom, the United States, and Sweden also started the "accessible design toys for people with visual difficulties" activities.

Othello.

Mutual Aid Programs

The JTA runs various Mutual Aid Programs at a reasonable premium by making use of the scale merits of the Programs.

Product Liability Mutual Aid Program

Overseas Product Liability Mutual Aid Program

Mutual Aid Program for Product Recall

Mutual Aid Program for Credit (the credit insurance for receivables in case of bankruptcy of client companies)

Mutual Aid Program for Distribution (the general transport insurance of distribution of toys, the marine insurance of out-ward voyage cargo)

Note 1: The JTA provides the Toys General Liability Mutual Aid Program in case of an accident caused by toys bearing ST Mark. The toy company contracting the ST Mark license agreement with the JTA shall join this Program

Note 2: Among the Mutual Aid Programs of the JTA, the Toys General Liability Mutual Aid Program is managed and operated by the JTA. Concerning other Mutual Aid Programs, the JTA has contracts with insurance companies to secure the sustainable operation of these Mutual Aid Programs.

Promotion of International Relationship

The JTA promotes international relationships.

- ① Participating in the activities of the ICTI (International Council of Toy Industries)* and the ACTI (Asian committee of Toy Industries). The activities include ICTI's establishment of the "Code of Business Practices **."
- ② Participating in the development of the international standard for toys safety as the National Committee to ISO/TC181 (Technical Committee for toys safety).
- ③ Relating with toy associations in other countries.

* ICTI (International Council of Toy Industries)

The ICTI (International Council of Toy Industries) is the international council which consists of Associations of the toy industry around the world.

It was established in 1974 for the improvement of toy safety and promotion of development for the toy industry.

The participating nations are: Argentina, Australia, Austria, Brazil, Canada, China, Taiwan, Netherlands, France, Germany, Hong Kong, India, Japan, Mexico, Spain, Great Britain, and United States.

The current chairman is Mr. Ulrich Brobeil (Germany).

**Code of Business Practices

Many worker's death after fires at toy factories in Thailand and China in 1993 leads the ICTI to determine to establish the Code with which a toy company should comply concerning work safety of a toy factory, and to start the drafting work. The ICTI adopted all documents relating to the Code of Business Practices till June 2002.

Provision of information

The JTA provides the public with information on the toys and toy business through its website.

The members-only section of its website shares announcements of competent authorities or information on the toy industry.
