

# TIPS FOR FIRST-TIMERS

- Be sure to bring an all-weather coat, umbrella, and a sweatshirt. Las Vegas weather tends to be moderate during the day (approximately 50-55°) and chilly in the mornings and evenings. Remember: During move-in hours, the freight doors are open, creating a cold exhibit hall. Check local Vegas weather on the Internet prior to packing.
- If time permits, walk around and familiarize yourself with Las Vegas, transportation options and the CES venues.
- Familiarize yourself with your hotel and the services it provides. Find out if there is a business center, Internet access, and room service. Also make sure to ask where your hotel is located in relation to the CES venues.
- **Wear comfortable shoes at all times.** In addition, you can rub your feet with rubbing alcohol or peppermint lotion to reduce swelling at night.
- Drink plenty of water. The climate in Las Vegas and the Convention Center is very dry. Do not allow your body to get dehydrated.
- Get plenty of rest.
